Work History

2021-10 - Current

Salesforce Developer

Amiable Infotech, Noida,UP

Project : Salesforce Developer Customisation & Configuration
Client : Home care Home Base
Role : Salesforce Developer

Company Description:-

Homecare Homebase is a cloud-based automation solution for hospice and home care agencies. The solution provides real-time data exchange and communication between field staff, office and physicians. It offers interoperability with the healthcare community, driven by the Continuity of Care Document (CCD) specification.

Responsibilities:-

- Responsible for creating custom objects, custom Tabs, custom Fields in Salesforce.com
- Develop and maintain documentation of Salesforce configuration, customizations, and integrations for knowledge transfer and future reference.
- Involved in creating Users, Profiles and Roles Based on Organization role hierarchy and implemented Record-Level, Field Level security and configured their sharing settings
- Maintained and customized Salesforce.com scopes such as Users, Roles, Profiles, Groups, accounts, contacts, record types, sharing rules, custom objects, validation rules and page layout customization to support vital business functions.
- Participate in code reviews, testing, and deployment activities to ensure high-quality and scalable solutions.
- Worked on Flows, Process builder and approval process to automate the business Process.
- Involved in integrations between Salesforce and other external systems using APIs and web services
- Designed and developed customizations using Apex triggers, classes, and controllers, and performed SOQL queries to manipulate data within Salesforce
- Worked with asynchronous operations such as future methods, and Batch Apex classes to process large data sets and perform scheduled tasks.
