## Salesforce Developer

*Amiable Infotech, Noida,UP*
**Project : Salesforce Developer Customisation & Configuration**
**Client : Home care Home Base**
**Role : Salesforce Developer**
Company Description:-
Homecare Homebase is a cloud-based automation solution for hospice and home care agencies. The solution provides real-time data exchange and communication between field staff, office and physicians. It offers interoperability with the healthcare community, driven by the Continuity of Care Document (CCD) specification.
**Responsibilities:-**

- Proactively participate and communicate with team members in client discussion and from analysis through resolution, to keep them informed of status.
- Responsible for creating custom objects, custom Tabs, custom Fields in Salesforce.com
- Develop and maintain documentation of Salesforce configuration, customizations, and integrations for knowledge transfer and future reference.
- Maintained and customized Salesforce.com scopes such as Users, Roles, Profiles, Groups, accounts, contacts, record types, sharing rules, custom objects, validation rules and page layout customization to support vital business functions.
- Customizing the functionalities and UI as per the business requirement.
- Participate in code reviews, testing, and deployment activities to ensure high-quality and scalable solutions.
- Worked on Flows, Process builder and approval process to automate the business Process.
- Built and maintained integrations between Salesforce and other external systems using APIs and web services
- Designed and developed customizations using Apex triggers, classes, and controllers, and performed SOQL queries to manipulate data within Salesforce
- Worked with asynchronous operations such as future methods, and Batch Apex classes to process large data sets and perform scheduled tasks.
